Hi Fellow Tester,

It's time to do some serious reading! The project has kicked-off.

You are assigned to test the net banking facility of the esteemed "Guru99 Bank"

Refer the SRS document here

Read all the functionalities mentioned very very carefully.

Here is a link to test case templates

So start making test cases!
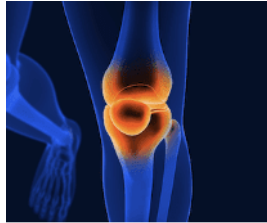

See you tomorrow

Happy Testing

Team Guru99

Note:

- You may be wondering where is the link to the Application Under Test (AUT) ? Well in many test projects, you get access to AUT only when the Test Execution phase starts(especially in projects where the application is being developed from scratch). It's very easy to prepare test cases when you can see the AUT. We will train you to develop test cases when there is the AUT is NOT ready
- This project simulates real time Banking website for your training. It does not bring any commercial benefits to Guru99 (apart from hosting expenses and plethora support emails :-)). Accordingly there is no payment to the tester.

- Many of you are First Time Testers and have never written Test Cases before. For such students we recommend that you watch the following tutorials in order - First Steps Test Case Development, Test Scenario , Test Case Specifications, Test Basis
