Hey there,

How is it going? Do we have any test cases ready yet?

Are you finding things difficult? If yes, that's good :) because, you are learning.

Currently, you are lost and have no clue, where to begin your test case creation.

You reach your supervisor/client with the problem, who in turns contacts the development team.

The development team informs that, in the first version of the banking site, they will implement the following modules for the Manager -

- New Customer
- Edit Customer
- New Account
- Edit Account
- Delete Account
- Delete Customer
- Mini Statement
- Customized Statement

This gives you a start!

You can forget everything else & concentrate on the above 8 modules for the Manager Role.

Regards

Team Guru99

NOTE: Tomorrow we will send you Test Cases prepared by our experts. You can compare your test cases with that of experts and elicit improvement points.
